HOW TO USE THIS CATALOG AND LOCATE PARTS

This Catalog is divided into Part Groups in which illustrations for parts of a similar function and/or location are published. The Group Contents listing on the next page shows the type of parts contained in each group. Tabs are provided or available to separate each group.

Several methods may be used to locate a specific part:

- Option 1: From the Group Contents listing, select the group which would most logically contain the part to be found. Or open the catalog to Group 1, Master Group Illustration Index. Select the illustration group most likely to contain the parts associated. Turn to the Illustration Index in front of that group to select illustration and locate the parts item numbers and associated text information
- Option 2: If the "noun" name of the part you seek is known, an alphabetical index of Nouns and illustration titles is provided to assist in finding the part. Several keys may be found in this index.

- Option 3: If the part number is known but the applications need to be determined, refer to the numerical index. This index shows the group, illustration number and item for each part listed in the catalog. Multiple references mean the part is listed more than once.

PAGE NUMBERING

Two-part page numbers are used throughout this catalog. The first part of the page designation indicates one major group or section. The second part indicates the actual page number in the group. For example:

2-1 indicates Group 2, Front Suspension, Page 1
4-4 indicates Group 4 Parking Brakes, Page 4

In the maintenance of the Loose Leaf Parts Catalog Revision Service, it may become necessary to add information beyond the capacity of the page. In this event, an "A" page will be used. For example, if it becomes necessary, because of change, to add several part numbers to page 2-1 and space does not permit the addition, you will be given Page 2-1A. Page 2-1A should be filed immediately following Page 2-1

Figure and Item Numbers are also commonly used to identify locations in this Catalog, i.e., 14-910/8 refers to Group 14, illustration 910, Item Number 8. Illustration Numbers are always ascending sequential within the Groups

RIGHT AND LEFT PART NUMBERS

Right and Left part numbers are frequently combined on one line, e.g., 3514 444-5. Such numbers are interpreted as 3514 444 Right side application and 3514 445 Left Side. Right and Left Sides are always determined by their relationship to the driver when normally seated and looking forward.

SYMBOLS USED IN THIS PARTS CATALOG

The following symbols are commonly used with Part Number and quantity information in this Catalog:

BOLD TYPE - European only.

- Precedes a new part number to the catalog and remains in subsequent issues until stock is available for shipment.

AR - Indicates the quantity required may vary or is to be determined by the user.

PAR - Indicates Paint As Required.

— - Indicates Item Not Illustrated.

SPECIFYING INFORMATION

The following information is included in this Parts Catalog:

1. Part Name.

2. Part Number.

3. Model Application.

4. Quantity used per vehicle.

5. Description and dimensions necessary for proper identification of parts where necessary.

6. Model or Engine Column:
Engine by Displacement or Vehicle Model
Code Body Style Code or Price Class.
7. Effective points of model year running changes are indicated by vehicle serial number, engine number or body number where applicable. When serial number effective points are not available, production effective dates are used. (Refer to the Federal Certification Label for the build date.)

8. Parts designated as CANADA or EXPORT are not available through U.S. parts outlets.

In the event replacement parts not listed herein are required due to a special service situation, Chrysler Dealers should contact their factory specifier for assistance. Problems encountered with particular part specifications can be resolved in the same manner.

ILLUSTRATION INDEX

This index is a compilation of catalog parts description data with reference to illustrations, figures and key numbers as shown:

ILLUSTRATION INDEX	GROUP	ILLUS. NO.
THROTTLE BODY	14	600

The first page of each group contains a listing of all illustrations within that group. Also refer to illustrations alphabetically listed in information section.

ALPHABETICAL INDEX

This index is a compilation of catalog parts description data with a reference to the location of the item by group - Figure and key number as shown in the following example:

THROTTLE BODY	14 - 610/ 18
Group	
Illustration No.	
Item	

The index will be expanded progressively as data is added to computer files. To locate a part by name, refer to the Alphabetical Index. This index indicates the group and illustration and item number where the part is located. Alphabetical Index can be found in INF section of catalog.

NUMERICAL INDEX

A listing of Part Numbers contained in the catalog. The numbers are in numerical sequence with reference to the group and illustration and item number where the part is located.

PARTS PACKAGES

Service Parts Packages, containing all parts needed for specific service operation, are listed in their respective groups with related parts. The listing will show adaptability and model application.

STANDARD PARTS

Important attaching standard parts such as bolts, nuts, etc. are generally listed in the text of the respective major parts groups.

CATALOG AND PARTS BULLETINS

BULLETINS are issued when important changes are made in production or when corrections are to be made in the Parts Catalog between regular revisions. All catalogs should be noted and changed accordingly to remain current between revisions.

PARTS CATALOG REVISION SERVICE

Subscribers to the Passenger Car Catalog Revision Service will be periodically provided with revised copy incorporating the latest information. Revisions may be provided by Group or complete book copy.

NEWPART INDEX

A listing of new part numbers contained in the catalog. The numbers are in group sequence with reference to the illustration and item number where the part is located.

COLOR CODED OR COMBINED PART NUMBERS

Appearing throughout this catalog are part numbers containing both letters and numbers. For example: D500 KB7. These are good serviceable part numbers. The combination of letters and numbers merely indicates the parts are keyed to the interior color of the vehicles on which they are used.

In addition, Right and Left part numbers are frequently combined on one line; e.g. D500 -1 KB7. Such numbers are interpreted as D500 KB7, Right side application, and D501 KB7 Left side. Right and Left Sides are always determined by their relationship to the driver when normally seated and looking forward.

INTERIOR TRIM

Refer to the Group IT, Interior Trim section of the catalog, for information relative to Interior Soft and Hard Trim, Rolled Stock, etc.

In states where license fees are based on displacement or taxable horsepower it will be necessary to change the vehicle registration only if the replacement engine differs from the one it replaces.

VEHICLE SAFETY CERTIFICATION LABEL

A vehicle safety certification label is attached to the rear facing of the drivers door. This label indicates date of manufacture (month and year), Gross Vehicle Weight Rating (GVWR), Gross Axle Weight Rating (GAWR) front, Gross Axle Weight Rating (GAWR) rear and the Vehicle Identification Number (VIN). The Month, Day and Hour of manufacture is also included.

All communications or inquiries regarding the Vehicle should include the Month-Day-Hour and Vehicle Identification Number.

VEHICLE IDENTIFICATION PLATE

All assembly plants use a uniform method of assigning vehicle serial numbers (VIN). This number consists of 17 digits and is shown on the Vehicle Identification Plate which is located on the instrument panel - visible thru the windshield. The VIN number (serial number) also appears on the Federal Certification Label located on the left front door frame. (Always specify the vehicle serial number when ordering parts by description). A description of serial numbers follows:

- WORLD MANUFACTURE IDENTIFICATION - Pos. 1 thru 3.
- VEHICLE DESCRIPTOR SECTION - Pos. 4 thru 8.
- CHECK DIGIT - Pos. 9.
- VEHICLE IDENTIFICATION SECTION - Pos 10 thru 17.

SALES CODES

Due to the increase complexity of qualifications required to describe the application of some replacement parts; particularly those related to the Emission Control System, Sales Codes are used on a selected basis in some areas of this publication.

Normally, Sales Codes will be employed as secondary qualifiers and are for the express purpose of providing positive identification of parts applicable to vehicle components or systems so complex in nature that normal methods of written qualification are either inadequate or confusing.

The Sales code will always appear after the written description of the part; will be enclosed in parenthesis; will be prefixed S/C, and will follow a hyphen appended to the S/C, e.g.: (S/C-NAE).

To determine whether or not the vehicle for which the part is being specified was built with a particular Sales Code it will be necessary to refer to the Body Code Plate depicted on page INF-11. Sales Codes are also listed on vehicle invoices and on the Maroney label which is affixed to the side glass on new units.

METRIC SYSTEM

Figure art, specifications, and tightening references in this Service Manual are identified in the metric system and in the SAE system.

During any maintenance or repair procedures, it is important to salvage metric fasteners (nuts, bolts, etc.) for reassembly. If the fastener is not salvageable, a fastener of equivalent specification should be used.

WARNING: USE OF AN INCORRECT FASTENER MAY RESULT IN COMPONENT DAMAGE OR PERSONAL INJURY.

The metric system is based on quantities of one, ten, one hundred, one thousand, and one million.

Mega - (M) Million	Deci - (D) Tenth
Kilo - (K) Thousand	Centi - (C) Hundreth
Milli - (m) Thousandth

This technical drawing is an exploded view of a mechanical assembly, likely a pump or engine component. It features 39 numbered parts. The main assembly includes a long, thin metal plate (2) with several mounting tabs (3, 4, 5, 9, 12, 13, 14, 15, 16, 17, 23, 24, 25, 26, 31, 32, 33, 34, 35, 36, 37, 38). A large, curved metal pipe (11) is shown with various fittings and flanges (10, 12, 13, 14, 15, 34, 35). A complex mechanical housing (18) is shown with a large circular opening (19) and a smaller opening (20). A large, circular pulley (27) is shown with a central shaft (28) and a nut (29). A small, rectangular component (30) is shown with a central opening (31) and a flange (32). A small, cylindrical component (33) is shown with a flange (34) and a mounting bracket (35). A small, rectangular component (36) is shown with a central opening (37) and a flange (38).

This diagram shows an exploded view of a mechanical assembly. The components are labeled with circled numbers: 1, 2, 3, 4, 5, 6, 7, and 8. The assembly consists of a main housing (1) with internal slots (2) and a base plate (3). A cover (4) is shown above the housing, secured by screws (7). A bracket (5) is attached to the side of the housing. A small component (8) is shown near the base plate. Several screws (6) are used to secure the assembly, including one at the bottom right and others along the edges of the base plate and housing.

Figure 19-220

This diagram is an exploded view of a mechanical assembly, likely a pump or motor component. It shows 25 numbered parts and their assembly relationships. The main components include a central housing (1), a motor or actuator (19), and various mounting brackets (3, 4, 6, 15, 16, 17, 18, 25). Fasteners such as screws (8, 9, 11, 12, 22, 23, 24) and pins (7, 10, 13, 14) are shown in their respective assembly positions. The diagram uses dashed lines to indicate the alignment and fit of the parts.

Figure 24-410

This exploded view diagram illustrates the assembly of a mechanical component, likely a pump or motor housing. The components are identified by numbered callouts:

- 1:** A bracket or support structure with two circular end pieces.
- 2:** The main cylindrical housing or pump body, featuring various ports and mounting flanges.
- 3:** A small, L-shaped bracket or pin.
- 4:** A large circular flange or end plate.
- 5:** A smaller circular flange or end plate.
- 6:** A small circular washer or spacer.
- 7:** A small rectangular shim or spacer.
- 8:** A pair of small circular washers or spacers.
- 9:** A small circular washer or spacer.

The diagram shows the relative positions and assembly sequence of these parts, with lines indicating how they fit together.
