NOTICE

This list of special service tools has been prepared for quick and easy reference, to enable you to find the appropriate service tool(s) for each model.

The special service tools have been improved and upgraded for each new model. However, your existing service manual does not include the latest information. Also, the list does not cover the models of which information could not be obtained at the time of preparation of the manual. The information will be provided through the next issue of the special service tool list.

| | |
|-----------------------|---|
| Outboard motor models | : All models to be released only in this fiscal year (except those of which information can not be obtained) |
| Watercraft models | : All models including those released in several years ago to the latest models (The new models of this fiscal year may be excluded because the development period of watercrafts is different from that of the outboard motors.) |

The special service tools mentioned in the service manual of each model are listed here.

Tool numbers in round brackets indicate current tool numbers, and will be replaced with the replacement tool numbers (not in brackets) when stock runs out.

In addition, the tool names always appear in English in this manual.

MANUAL FORMAT APPLICATION CHARTS

Tool numbers and the outboard motor/watercraft models to which they apply are shown in the charts.

Tools, which are to be supplied in an assembly, are listed with a dot (●) in front of the tool name.

(●) :Dots in round brackets indicate that the particular tool is not absolutely necessary and which can be substituted by another tool.

[] :Square brackets indicate that the tool applies only to models in square brackets in the corresponding column header.

TOOL DESCRIPTIONS

The tool number, name, illustration, and description of its use are shown. The required tool size is also given to assist in the identification of the correct tool.

The construction and meaning of each section are as follows:

| | |
|-------------------------------|---|
| Measuring tool | : Mechanical or electrical precision tools (Some measuring tools may be listed in one of the following sections instead.) |
| Engine servicing | : Special tool for engine servicing |
| Lower unit/jet pump servicing | : Special tool for lower unit/jet pump servicing |
| Shim selection, PTT tool | : Special tool for shim selection and power trim and tilt unit servicing |

REPAIR KITS (RECONDITION TOOL)

The following kits can be used for repairing/replacing damaged parts, avoiding the need to replace the whole unit. Some skill is required to use these.

| | |
|---------------------|---|
| “Heli-sert” kit | : For reconditioning damaged bolt threads |
| Marine terminal kit | : For repairing conventional marine round plug/socket and eye terminals This water-resistant and rust-resistant connector type, although similar, is different from that on a motorcycle. |
| Coupler kit | : For repairing water-resistant multiple pole couplers |

NOTE:

Identify the correct coupler and do not try to use a coupler of the incorrect type.

INDEX

Find the desired tool through its number (part number) in order to determine the page in the APPLICATION CHARTS and TOOL DESCRIPTIONS, where a more detailed explanation of the tool can be found.

NOTE

Cette liste d'outils spéciaux a été préparée afin que les mécaniciens puissent trouver rapidement et aisément le ou les outils spéciaux requis selon les modèles.

Yamaha a modifié et amélioré certains outils d'entretien spéciaux pour les nouveaux modèles. Toutefois, votre manuel d'atelier existant ne comprend pas ces nouvelles informations. De même, la liste ne concerne pas les modèles dont on ne disposait pas d'informations au moment de la préparation du manuel. Les informations seront présentées dans la prochaine publication de la liste d'outils spéciaux.

| | |
|-------------------------------|--|
| Modèles de moteur hors-bord | : Tous les modèles à sortir cette année fiscale (à l'exception de ceux à propos desquels on ne peut pas obtenir d'informations) |
| Modèles de scooters nautiques | : Tous les modèles de ceux sortis il y a plusieurs années aux modèles les plus récents (Les nouveaux modèles de cette année fiscale peuvent être exclus car la période de développement des scooters nautiques est différente de celle des moteurs hors-bord) |

Les outils d'entretien spéciaux mentionnés dans le manuel d'atelier pour chaque modèle sont mentionnés ici.

Les numéros d'outils entre parenthèses indiquent les numéros des outils actuels et seront remplacés par les numéros des outils de rechange (pas entre parenthèses) à l'épuisement du stock.

Le nom des outils figure en anglais.

ORGANISATION DU MANUEL

TABLEAUX D'APPLICATION (APPLICATION CHARTS)

Le numéro des outils spéciaux ainsi que les modèles de moteur hors-bord/de scooter nautique auxquels les outils spéciaux s'appliquent sont indiqués dans des tableaux.

Dans ce catalogue, les outils qui sont fournis dans un ensemble sont précédés d'un point (•).

(●) : Les points entre parenthèses indique que l'outil n'est pas absolument nécessaire et qu'il peut être remplacé par un autre outil.

[] : Les crochets indiquent que l'outil ne s'applique qu'aux modèles qui sont entre crochets dans l'en-tête de colonne correspondante.

FONCTION DES OUTILS (TOOL DESCRIPTIONS)

Les informations données pour chacun de ces outils comprennent leur numéro, leur nom, une représentation graphique et leur fonction.

Pour plus de commodité d'identification des outils, la taille requise pour l'outil est également indiquée.

Les outils spéciaux sont répartis dans les sections suivantes :

| | |
|---|--|
| Outil de mesure | : Outil de précision mécanique ou électronique (Tous les outils de mesure ne figurent pas nécessairement dans cette section. Contrôler la liste des sections suivantes.) |
| Entretien du moteur | : Outil spécial requis pour l'entretien du moteur |
| Entretien du boîtier d'hélice/ pompe de propulsion | : Outil spécial requis pour l'entretien du boîtier d'hélice/pompe de propulsion |
| Sélection de cales, outil pour PTT | : Outil spécial requis pour la sélection de cales et l'entretien du système d'assiette et d'inclinaison assistées pour PTT |

KITS DE REPARATION (OUTIL DE RECONDITIONNEMENT)

Les kits suivants permettent de réparer/remplacer des pièces endommagées et d'ainsi éviter de devoir remplacer les assemblages.

L'emploi de ces kits de réparation requiert certaines compétences.

| | |
|-----------------------|---|
| Kit de taraudage | : Pour le reconditionnement des filetages de boulon endommagés |
| Kit de bornes marines | : Pour la réparation des fiches/prise rondes marines classiques et les cosses. Ce type de connecteur résistant à l'eau et à la corrosion est différent de celui d'une motocyclettes, bien qu'il soit similaire. |
| Kit de coupleur | : Pour la réparation de coupleurs à multipôles étanches |

N.B.:

Identifiez le coupleur correct et n'essayez pas d'utiliser un coupleur d'un type incorrect.

INDEX

Les outils sont classés d'après leur numéro. Se servir de ce numéro pour trouver la page des sections Tableaux d'application (APPLICATION CHARTS) et Fonction des outils (TOOL DESCRIPTIONS) contenant les renseignements détaillés de l'outil recherché.

AVISO

Esta lista de herramientas de servicio especiales ha sido preparada para encontrar rápida y fácilmente la(s) herramienta(s) de servicio necesarias para cada modelo respectivo.

Las herramientas de servicio especiales han sido mejoradas para ser utilizadas en los nuevos modelos.

Sin embargo, su manual de servicio existente no cubre la información más reciente. Además, la lista no incluye los modelos sobre los cuales no pudo obtenerse información en el momento de preparación del manual. Esta información se facilitará en la próxima publicación de la lista de herramientas especiales de servicio.

Modelos de motores fueraborda : Sólo todos los modelos que se lancen en este año fiscal (excepto aquellos sobre los cuales no puede obtenerse información)

Modelos de embarcaciones : Todos los modelos, incluidos los lanzados, desde hace varios años hasta los últimos modelos (los modelos nuevos de este año fiscal pueden ser excluidos porque el período de desarrollo de las embarcaciones es distinto del de los motores fueraborda).

Aquí se enumeran las herramientas especiales de servicio mencionadas en el manual de servicio de cada modelo.

Los números de herramientas entre paréntesis indican los números de las herramientas nuevas y deben sustituirse por los números de las herramientas de repuesto (no entre paréntesis) cuando se agoten las existencias.

Además, los nombres de las herramientas siempre aparecen en inglés en este manual.

FORMATO DEL MANUAL

TABLAS DE APLICACIÓN

En las tablas se muestran los números de herramienta y los modelos aplicables de motores fueraborda y moto de agua.

Las herramientas suministradas como conjunto se señalan con un punto (●) que precede al nombre de la herramienta.

(●) : Los puntos entre paréntesis indican que no es absolutamente necesaria la herramienta específica y que puede sustituirse por otra herramienta.

[] : Los corchetes indican que la herramienta se aplica sólo a los modelos entre corchetes en el encabezado de columna correspondiente.

DESCRIPCION DE LAS HERRAMIENTAS

Se muestran el número, el nombre, y la ilustración de las herramientas, y la descripción de su utilización.

Se indica también el tamaño de la herramienta necesaria para ayudarle a identificarla con más facilidad.

La construcción y el significado de los elementos son los siguientes:

Herramienta de medición : Herramientas de precisión mecánicas o eléctricas (Algunas herramientas de medición pueden estar enumeradas en una las secciones siguientes.)

Servicio del motor : Herramienta especial para el servicio del motor

Servicio de la unidad inferior/bomba de inyección : Herramienta especial para el servicio de la unidad inferior/bomba de inyección

Selección de laminillas, herramienta PTT : Herramienta especial para la selección de laminillas y el servicio de la unidad de estibado e inclinación motorizados

JUEGOS DE REPARACION (HERRAMIENTA DE RECONDICIONAMIENTO)

Los juegos siguientes pueden utilizarse para la reparación/reemplazo de las partes dañadas para evitar el reemplazo de toda la unidad. Para emplear estos juegos se necesita experiencia práctica.

Juego "Heli-sert" : Para reacondicionar las roscas de los pernos dañadas

Juego de terminales marinos : Para reparar los terminales de ojal y acopladores redondos convencionales de uso marino. Este tipo de conector resistente al agua e inoxidable, aunque similar, es diferente del de una motocicleta.

Juego de acoplador : Para reparar los acopladores multipolares resistentes al agua

NOTA:

Identifique el acoplador correcto y no trate de utilizar un acoplador del tipo incorrecto.

ÍNDICE

Podrá encontrar las herramientas que busca empleando su número (numero de parte) para poder determinar la página de las TABLAS DE APLICACIÓN y de la DESCRIPCIÓN DE LAS HERRAMIENTAS, donde se da una explicación más detallada de las herramientas.
