

Instrument Panel Accessory Bezel Replacement

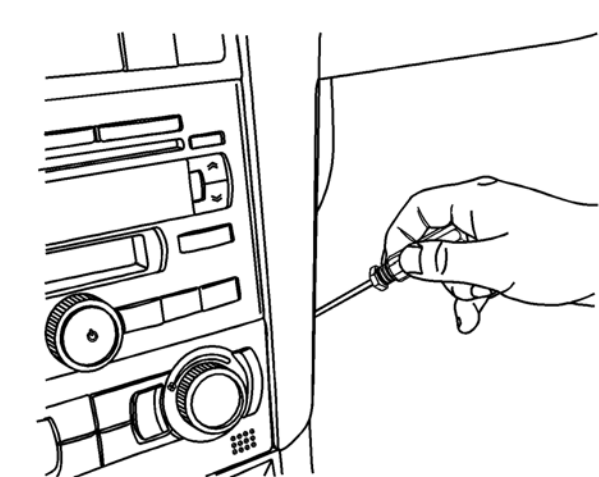

Removal Procedure

Important: Use tape around center trim bezel and the end of the flat bladed tool to protect from scratches.

1. Using a flat bladed tool, unfasten the center trim bezel clips from the instrument panel.
2. Remove the center trim bezel from the instrument panel.

Installation Procedure

1. Position the center trim bezel to the instrument panel.
2. Press the center trim bezel to the instrument panel making sure the clips are fully seated.
