

Power Seats System Description and Operation

[Seats](#)

Do not attempt to change the designed seat position by altering the designed seat adjuster-to-floor pan anchor provisions or the seat adjuster-to-seat frame anchor provisions. Changing the seat position could affect the performance of the seat system.

This vehicle is equipped with front seats with adjustable head restraints, and a 3-passenger rear bench seat with an optional split folding rear seat. The front seats also have a recline, a height, and a lumbar adjustment. A power driver seat is optional. Seat cushions and seatbacks have formed foam pads, which fit the contours of the full panel seatback frame assembly and the designed contour of the seat cushion frame.
