

## Steering Angle Sensor Calibration Warning

**Warning:** For vehicles with electric power steering (EPS) and without a vehicle stability enhancement program, the steering angle sensor MUST always be calibrated after the battery has been disconnected. Failure to calibrate the steering angle sensor could limit the operation of the EPS system and result in personal injury.

To ensure proper calibration of the EPS system, do the following:

1. The engine should be on with the vehicle stationary.
2. Turn the steering wheel counterclockwise until it stops.
3. Turn the steering wheel clockwise until it stops.
